MRCGP Examination

Recorded Consultation Assessment Frequently Asked Questions (FAQs)

To be read in conjunction with the RCA Policy Document and Candidate Handbook.
Last revised 22 May 2020

The College RCA group have been developing these documents to help the training community with the RCA. They continue in development and should not be considered as the final versions, rather as the latest. However, the College wants to get this information out to the training community as soon as possible so that everyone can understand the direction of travel that the RCA group are taking in their developments.

Eligibility and administrative

- 1. If I failed the CSA at a previous attempt, am I eligible to sit the RCA in July to allow me to CCT on time?** This session is available to all candidates due to CCT on or before 30 September 2020 who have not yet passed the CSA.
 - 2. I would rather take the CSA than the RCA. Do I have that option?** Currently, it is not possible to safely deliver the CSA within the current Government restrictions on social distancing. The risk to all involved including candidates, examiners and staff is currently too great for this to be an option at the present time. As and when these restrictions are lifted, the CSA will be resumed, at which point the RCA will no longer be required.
 - 3. Does this attempt account as one of my exams attempts?** Under the current arrangement agreed by the GMC this is a temporary assessment available in extraordinary circumstances. RCA attempts undertaken before 30 September will not count as one of your four permitted attempts at CSA. After 30 September it is anticipated that RCA attempts will count as one of your four attempts.
 - 4. If I don't pass the RCA, will my resit be an RCA or a CSA exam?** Your resit will be in the examination available at the time that you apply to resit. It is currently difficult to predict whether that will be the CSA or a future RCA if the pandemic and restrictions on social distancing and the disturbance that flows from that continue or recur.
 - 5. I narrowly failed the CSA once in February/March 2020 and was planning to resit in May 2020. As I feel prepared for the CSA can I defer my resit until after my CCT date at the start of August rather than attempt this different assessment?** This would be a decision to discuss with your Educational Supervisor and TPD or Head of School. At the present time, it is not possible to predict when the next sitting of the CSA will be.
 - 6. I have tried to book online for the RCA in July. It says that I am not eligible to apply as my CCT is in October? I would like to request to be considered as I am pregnant, and my first baby was early?** Please refer to the section on reasonable adjustments and if you consider you might fulfil the criteria please submit a request as outlined in the Examination regulations.
- 

- 
7. **This is a new examination. How do I know that in future employers will treat it as an equivalent qualification to the MRCGP obtained via the CSA?** The assessment has been approved by the GMC as equivalent in standing to the CSA for the purpose of CCT during the current pandemic distancing restrictions and you will be awarded the MRCGP and CCT as will your peers.
 8. **I have passed the CSA but believe I would have gained a higher mark in the RCA as I found the RCGP assessment centre intimidating and I was stressed. Am I be allowed to sit the RCA to improve my mark?** No. This examination is available only to those candidates who have not yet been able to sit and pass the CSA. It is to facilitate their ability to demonstrate competence in time to then achieve their CCT, if appropriate.
 9. **I understand that the RCA will be cheaper than the CSA - will all candidates be eligible for a refund of the difference?** The cost of the RCA will be equivalent to that of the CSA. the cost of the exam is pre-determined, and refunds cannot be given.
 10. **I am an ST2 trainee and because I have a disability would prefer to sit the RCA in my ST3 next year. Will this still be available to me?** At the current time it is not possible to predict when the MRCGP will revert to the CSA. The exam you will need to take will be the one current at the time you apply.
 11. **Will my ARCP and CCT dates be affected?** The committee of General Practice Education Directors (COGPED) are working hard with the GPSA to ensure that all the necessary checks are undertaken as soon as possible, and where appropriate before you actually sit the RCA, so that your ARCP outcome can be issued on receipt of your exam result and your application for CCT can be fast-tracked.
 12. **I'm currently in a general practice placement in ST2. Am I eligible to take RCA?** No, it is currently available only to those who are due to CCT by the end of September 2020
 13. **I understand that there is a system for an examiner to record a serious concern, what does this mean?** If the examiner observed a candidate acting in a fashion which would warrant a GMC referral in the workplace, they would raise this concern for review by the senior examination team. This might include acting in a way to cause serious distress or danger to the patient/relative or colleague.
- 

14. How can I access the Fourteen Fish RCA platform for submitting my recordings?

You will book your RCA assessment via the RCGP as usual. Once your booking is confirmed you will receive a link to access the RCA platform on to which you will be able to submit recordings or record directly.

15. My trainee is a TGPT and not had an opportunity to sit their exams, what do we do?

A TGPT trainees will now have the opportunity to sit both AKT and RCA/CSA. The conversation with the Educational Supervisor regarding readiness to sit your exam is now even more important, given the COVID-19 related disruption to your training.

Please note that all trainees (not just TGPT candidates, but also LTFT trainees, those on maternity leave, etc.) due to CCT in the next year who will now have a new issue due to exam currency as a result of the COVID-19 pandemic, should be offered an additional 6 months exam currency. In other words, the group of trainees now impacted by COVID-19, and only the group now impacted by COVID-19, will be allowed to carry forward an exam currency of 7 years and 6 months, rather than the normal 7 years”

16. I have already had my ARCP and been awarded an Outcome 10.2. Am I eligible to take the RCA? Yes, provided that at that ARCP you were rated Competent for Licensing in WPBA.

The cases

17. How do I get a range of cases?

During the COVID-19 pandemic most patients are being signposted to initial contact with a doctor. Your Clinical or Educational Supervisor and wider team, if aware of the type of cases you require, can be asked to divert this range of possible patients to you. We would suggest you record continuously to capture suitable material. See “guidance on types of cases” in the Candidate Handbook.

18. What do I do if my consultation is longer than 10 minutes?

The examiner will watch and assess the first 10 minutes of your consultation; anything beyond this time will not be assessed. This may mean an area of consultation such as safety netting is not then viewed, so we would encourage the majority of consultations submitted to be around 10 minutes.

19. How do I demonstrate examination of patients?

Many consultations are being performed remotely. Consultations where a subsequent examination is necessary to confirm or refute a diagnosis should include an explanation of why an examination is necessary, the examination to be performed and the function of that examination. This explanation will be considered by the assessor.

20. Why do I need to submit 13 cases?

This is the same number as cases assessed in the CSA which this exam is replacing. This allows you to cover a range of areas and differing types of cases. It is also the minimum number felt required to make an accurate and reliable assessment to delineate passing candidates.

21. How do I choose which cases to submit?

There is clear guidance in the RCA candidate handbook to enable you to choose a range of cases to best demonstrate that you possess the appropriate General Practice skill set across a range of clinical topics and levels of difficulty.

22. Some of my consultations are not in English. Can I include these with a transcription? No. The assessment has to be in English. We would suggest you do not utilise consultations requiring interpretation as inevitably these will take longer to conduct than the assessed 10-minute limit. You may need to plan to ensure you can consult in English do discuss this with your Educational Supervisor or TPD early.

23. Is it acceptable to include consultations with more than one person present at the same time? Yes. You may use a consultation with more than one person present although its content should only relate to one of the people present. You may consider that this is a more complex presentation/consultation and record it as such in your workbook.

24. My recording has failed part way through a consultation. I have recorded 8 minutes. Will the examiners take this into account if I tell them what happened in the last two minutes? The examiners can only make an assessment on what they see and hear in your submitted recording and not on your account of what happened after that time. If you believe the 8 minutes adequately demonstrated your skills, you may choose to submit this consultation, but it will be treated the same as any other.

- 
25. **My consultations are always less than 10 minutes. Is it acceptable for me to submit these cases?** An assessment will be made on the recordings you choose to submit to demonstrate your consulting which may be any length up to 10 minutes.
26. **A lot of my consultations are telephone triage. Can I submit these?** No, unless the triage becomes full consultation. Many consultations are being undertaken during the COVID-19 pandemic remotely by video or telephone as well as a minority being conducted face to face. Any of these would be acceptable.
27. **I have previously recorded a lot of consultations, some of which I've used as COTs with my supervisor. Can I submit these?** You may upload a previously recorded consultation but not if it has been previously marked as a COT and therefore already been used as evidence of a competence toward licensing in your WPBA. In line with GDPR stored cases would not normally be from more than three months ago.
28. **Some of my consultations are follow-up consultations, and don't contain a lot of history taking or explanation as I have already done these with the patient. Will these still be suitable for the exam?** You might discuss a specific case which involves follow up with your supervisor, but you should consider if it really is a good representation of all areas of consultation skills that the RCA is looking to assess before submitting it. See 'Candidate Handbook' for more information.
29. **I've read that I need to submit a paediatric consultation. Does this have to involve speaking directly to the child?** At present there is no stipulation that you must include a paediatric consultation, simply advice that including one would help you demonstrate a wider coverage of the curriculum and consulting skills. As in the current CSA the cases you submit may involve a third party such as a parent contacting you on behalf of the child but including a consultation directly with a child even via video may enable you to demonstrate your adaptable communication and consultation skills more clearly.
30. **Other healthcare professionals conduct consultations in my practice and then ask me for advice about them. Can I submit a proxy consultation, demonstrating that I have taken history through the nurse or paramedic and given management advice?** If you feel this scenario still enables you to take an adequate history from the third party and demonstrate sharing management options to fulfil the requirements of the criteria being considered, then you may choose to include one of these consultations.
- 

- 
- 31. Can I submit a consultation that is undertaken as part of a home visit? How will I record it if I'm not talking to the patient through my smartphone or the practice telephone?** The submission could be a home visit if you feel you could record it securely and within the 10-minute time frame.
- 32. The consultation was interrupted and therefore went on for longer than 10 minutes. However, the middle part of the consultation included three minutes where there was no interaction between myself and the patient. Can the examiner discount these, and continue watching until the end of the consultation?** The assessment will be carried out on the first ten minutes of the consultation submitted the recording must be continuous, so you may choose not to submit such a consultation.
- 33. My Wi-Fi dropped during one of the consultations I wanted to submit, and the sound is not so clear. Is it ok for me still to submit this consultation?** It is your responsibility to ensure that the quality of recordings you choose to submit is good enough in sound and picture for an assessment to be made by the viewer.
- 34. Many of my patients do not have access to a mobile phone - how will the system work?** If you are recording via the Fourteen Fish RCA Platform - the system will call the patients landline instead of a mobile. It will record the audio from the patient and the video from the doctor consulting.
- 35. How many recordings can I upload to the RCA Platform?**
At this current time there is no limit to the number of consultations you can upload. All recordings will be visible in a table from which you can select the 13 cases you wish to submit. On submission all recordings will no longer be accessible to you. To minimise risk of uploading the wrong consults you may choose to delete unsuitable consultations as you proceed rather than have too many stored to select from.
- 36. I understand I will submit direct from the Fourteen Fish RCA Platform- what if I change my mind about which cases I wish to be assessed?** This is an examination and you should consider your submission to be final and irreversible. The system will check with you before you complete your electronic submission.
- 

Other questions

- 37. What should I do if a patient withdraws consent to their consultation being used in the RCA after I've made my submission?** Consent, if recording via the Fourteen Fish RCA Platform will be automatically obtained from the patient at the start and then end of the consultation. If this is not forthcoming the recording will not be stored. This theoretical event should be very rare. If this should happen, you should inform the RCGP immediately who can convey the patients concern to Fourteen Fish.
- 38. What if I am shielding?**
Most consultations done within General Practice are currently done by telephone or video. All 13 cases submitted can be of consultations conducted remotely. There is no stipulation that any have to be done face to face. Examinations cannot be performed remotely but, as in day to day general practice during the pandemic, any examination deemed necessary should be described and explained to a patient as part of gaining their consent and to enable the time subsequently spent face to face to be minimised. This explanation will be considered in assessing your consultation.
- 39. I am shielding so working remotely, how do I obtain and record patient consent?**
Consent should be obtained verbally at the start of your recording and confirmed at the end. The time taken to gain that consent will not count as part of the ten minutes to be assessed. If you utilise Fourteen Fish Platform to record the consultation directly, the patient will be consented automatically by the system at both the start and the end of the consultation automatically.
- 40. What if I have a disability requiring a reasonable adjustment?**
Please refer to the existing examination regulations and if you believe you have the need for a 'reasonable adjustment' then complete the 'reasonable adjustment' form from the RCGP website or in the 'Candidate Handbook' under Reasonable adjustments.
- 41. Should I wear PPE if I am conducting a face-to-face consultation?**
If you are submitting a face-to-face consultation you should perform the consultation in whatever PPE is currently advised during the pandemic restrictions. However other restrictions on face covering as in the Examination Regulations still stand.

42. It states my Clinical or Educational Supervisor needs to “sign this off”. What if we disagree? The choice of cases is yours. The trainer is not being asked to assess the cases presented. They are simply being asked to verify that these are recordings of you consulting and that you understand the guidance on cases to submit.

43. If I have always received competent or excellent gradings on my COTs from my Educational Supervisor. Does this mean that I'm going to pass the RCA? Evidence from your WPBA is helpful in establishing your readiness for sitting an assessment but it is measuring different criteria from the RCA/CSA, so it is not a guarantee of performance nor an assessment within your submission for RCA.

44. Will I be marked down if I have a speech impediment or strong accent?
No. The assessors are well trained to assess all candidates and quality assured to avoid bias. However, if you have a concern that your speech may disadvantage you in some way and that you require an adjustment then please complete a request form. (See exam regulations on reasonable adjustments for disabilities.)
Insert hyperlink

45. What happens to the recordings after they been viewed?
Recordings will be inactivated from the Central Platform in line with GMC and GDPR guidelines after the Exam Board has ratified the results and published them. After this time the RCGP examination department will no longer have access to them.

46. Can I ask for my RCA to be re-marked if I'm not happy with the result?
No. Recordings will not be accessible to the Examination Department of RCGP after results are published and re-marking will not be an option.
